

## CougarCS Career Fair

### **Software Needs**

Cohegic has a need to build an online software that can capture user data, display in graphical flowcharts, and report it. The data input will be through graphical charts (like an organization chart).

The software tools could include Microsoft .Net, Java and other third-party tools.

### **Marketing Needs**

Leverage social media sites, internet SEO, blog and forums, to create a significant web presence.

### **Intern**

Cohegic is looking for an intern who is flexible, can learn and use different tools, do independent research, is reliable and professional, and interested in producing results quickly.
